

SuccessionTaskGenerator Class

Generates pathway tasks for Succession Cases based on Action Plan Template structure

Author Salesforce

Date October 2025

Creates a series of milestone tasks when Case.Pathway_Confirmed__c is set, mirroring the structure of Action Plan Templates but using standard Task objects.

Benefits over Action Plans:

- Can be deployed via Apex (no metadata API limitations)
- Appears in standard Activities timeline
- Fully automated trigger-based creation
- No UI clicks required

Template Structure: Final Grant: 5 tasks over 20 days New DAF Account: 4 tasks over 18 days Disclaim Assets: 4 tasks over 20 days

```

Methods

createPathwayTasks(newCases, oldCaseMap)

Creates pathway tasks for Cases with confirmed pathways

Signature

```
public static void createPathwayTasks(List<Case> newCases, Map<Id,Case> oldCaseMap)
```

Parameters

Name	Type	Description
newCases	List<Case>	List of Cases being updated
oldCaseMap	Map<Id,Case>	Map of old Case values

Return Type

void

generateFinalGrantTasks(caseId, ownerId, startDate)

Generates Final Grant pathway tasks (5 tasks over 20 days)

Signature

```
private static List<Task> generateFinalGrantTasks(Id caseId, Id ownerId, Date
startDate)
```

Parameters

Name	Type	Description
caseId	Id	

ownerId	Id	
startDate	Date	

Return Type

List<Task>

generateNewDAFTasks(caseId, ownerId, startDate)

Generates New DAF pathway tasks (4 tasks over 18 days)

Signature

```
private static List<Task> generateNewDAFTasks(Id caseId, Id ownerId, Date startDate)
```

Parameters

Name	Type	Description
caseId	Id	
ownerId	Id	
startDate	Date	

Return Type

List<Task>

generateDisclaimTasks(caseId, ownerId, startDate)

Generates Disclaim pathway tasks (4 tasks over 20 days)

Signature

```
private static List<Task> generateDisclaimTasks(Id caseId, Id ownerId, Date startDate)
```

Parameters

Name	Type	Description
caseId	Id	
ownerId	Id	
startDate	Date	

Return Type

List<Task>
