

Schema

Fields

Name	Label	Type	Description
Contact_Attempt_Count__c	Contact Attempt Count	Number	BRD Contact Cadence: Running count of contact attempts (1-5). Maps to BRD Day 0, 5, 35, 65, 95 cadence. Auto-increments with each task completion. After 5 attempts without contact, case escalates to trading/liquidation.
Contact_Established__c	Contact Established	Checkbox	BRD Phase 1-2: Indicates whether verbal contact has been successfully established with the successor. Used as gate to stop contact cadence automation. Only check after direct conversation where successor understands their options.
Deceased_Donor__c	Deceased Donor	Lookup	undefined
Execution_Status__c	Execution Status	Picklist	BRD Phase 4: Tracks the execution and settlement status of the chosen succession pathway. Different execution steps apply based on Pathway Confirmed (Final Grant, New DAF, Disclaim).
Form_Completed_Date__c	Form Completed Date	DateTime	BRD Phase 2-3: Date when successor completed and submitted the Succession Recommendation Form. Indicates readiness to proceed to Document Collection phase.
Form_Sent_Date__c	Form Sent Date	DateTime	BRD Phase 2: Date when Succession Recommendation Form (OmniScript) was sent to successor. Replaces

			deprecated SuccessorFormStatus__c with objective date stamp. Per BRD critical rule: form can only be sent AFTER verbal contact established.
New_DAF_Account_Number__c	New DAF Account Number	Text	BRD Phase 4 - New DAF Pathway: The newly established DAF account number where assets will be transferred. Populated during Step 1 (Verify new account established) of New DAF execution.
Pathway_Confirmed__c	Succession Pathway	Picklist	BRD Phase 2: Successor's chosen succession pathway. Three mutually exclusive options per BRD section 3.1. Pathway locks once documentation begins - cannot be changed after that point.
SLA_Status__c	SLA Status	Text	BRD Visual Indicator: Formula field showing case SLA status based on days open and contact status. Green (On Track), Yellow (Attention), Orange (At Risk), Red (Critical/Escalate). Per user request: escalates after 4 attempts, not 5.
Successor__c	Successor	Lookup	Lookup to successor Contact. Displays in highlights panel with clickable navigation to Contact record. Also used by Successor_Email__c and Successor_Phone__c formula fields.
Successor_Email__c	Successor Email	Text	Clickable email link that displays in the highlights panel. When clicked, opens email client to compose an email to the successor.
Successor_Phone__c	Successor Phone	Text	Clickable phone link that displays in the highlights panel. When clicked, initiates a phone call to the successor.
Verification_Status__c	Verification Status	Picklist	Workflow trigger field controlled by agent via Quick Action. Agent clicks "Begin Succession Processing" button to start workflow when ready. Despite 90%+ of cases arriving with documents, agent maintains control over workflow initiation.

Related Flows

Object	Name	Type	Description
Case	Case Create Initial Contact Attempt	Record After Save	Seeds Attempt 1 (Day 0) when Verification_Status__c becomes "Complete - Verified" on an Estate Administration case. Guards against duplicates via Contact_Attempt_Count__c IS NULL. Triggers on create or when the verification field changes. Adds Builder UI metadata for clarity.
Case	Case Parent Closure Handler	Record After Save	Monitors child case status changes and automatically closes the parent Multi-Account Succession Master case when all child Named Successor Enactment cases reach terminal status (Closed or Canceled).
Case	Case Status Coordination	Record After Save	Automatically coordinates Case Status field updates across the 5-phase succession workflow. Updates Status based on phase-tracking field changes (Verification_Status__c, Contact_Established__c, Form_Completed_Date__c, Pathway_Confirmed__c, Execution_Status__c).
Case	Case Succession Segment Transition	Record After Save	Logs key succession segment transitions and notifies the case feed. Triggers on Estate Administration cases when Contact_Established__c, Form_Completed_Date__c, or Pathway_Confirmed__c change. Posts a concise Chatter message indicating the new segment and next action to aid demo narration and agent handoffs.
Task	Task Create Next Contact Attempt	Record After Save	Creates the next contact attempt when the current attempt Task is completed. Schedules ActivityDate off Case.CreatedDate (Day 5/35/65/95). Exits when contact established or after Attempt 5. Includes fault connector for parent case lookup.

Task	Task Succession Contact Update	Record After Save	Sets Case.Contact_Established__c when a Task is completed with Succession_Contact_Established__c = TRUE. Acts as circuit breaker to stop the cadence. Includes fault connector for parent case lookup.
